About FineTek

Established in 1978 by Mr Wu Ting Kuo, FineTek business model is based on providing complete customized solutions for a wide range of industrial automation process applications – in liquid level, flow, pressure and temperature. The company is constantly developing and innovating, and at the same time enforcing its core vision - “to provide solutions that exceed customers' expectations.” In 1999, the company successfully expanded its operations both locally and internationally, achieving global success and recognition for quality products and services.

From 1999 to 2013, the company successfully grew and transformed with its operations expanding not just from within Taiwan, but globally with the setup of factories and branches in China and regional offices in the United States and Singapore. This development laid down the foundation for international business of FineTek Group. With emphasis placed on customer satisfaction, innovation, product development and overall business transformation, the company continued to innovate and expand with each passing year. In 2013, the factory in Yilan was upgraded and enhanced not only with increased capacity for manufacturing flow meters, but also with the additional of smart automation in the production process. Thus, FineTek successfully achieved global recognition, obtaining the leading position as Asia's top process automation sensor manufacturer.

From 2014 to 2018, Finetek achieved stable growth, continuously reviewing its five-year strategic plan to attain its goals. In 2014, the company successfully became publicly listed with its first IPO, then went on to merge with Mutec Germany in 2015. In 2016, subsidiary offices were established in Indonesia and Malaysia. In 2017, plans were put in place to build a production plant in Indonesia. In 2018, a group of FineTek R&D experts from various global offices were put together to not only develop high-end technological processes, but also incorporate Industrial 4.0, WIFI, 4G, NBIOT and other wireless transmission connection functions to our products to meet customers' need for the latest technology applications. These were implemented successfully, and FineTek products can be used in many different industries such as food & beverage, water, energy, pharmaceutical etc. In the past 5 years, the company has undergone tremendous growth and development – flourishing internationally and providing customers worldwide with the best customized solutions for process automation.

The company's management recognizes that it is important to not just be satisfied with its current level of success, but to continuously seek improvement. Change, customer satisfaction and profit-sharing are the main principles driving our employees in developing technology that result in new, improved and ecological products to sustain our environment for all people. FineTek will continue to strive to be the leading brand in the Process Automation market. Our goal - “To ignite the sensor industry, revolutionizing the world.”

Philosophy

Innovation

1. Innovation is our mission. In today's business world where new technology is infiltrating every field and industry, only by insisting on the pursuance of change and excellence can we ensure that our company maintains its position of sustainable growth.
2. Our goal is the entire global market, establishing process automation sensor integration systems which are able to cross over industry boundaries. Although our strongest competitors are firms from foreign countries, we nonetheless continue to operate as a world-class business by focusing on international operations.
3. We continue to undertake long-term strategic planning, providing clarity, direction and focus to our organization. This is crucial in achieving stability and sustainable profit & success. Every year, a review of the company's next 5 years plan is done to ensure that the business' operations aligns with the organization's goals and mission.

Customer Satisfaction (Quality)

1. We treat our customers as long-term partners, never as a competitor. With our dedicated support and cooperation, customers, too, grow together with us. This is the key to our success and the key to the company's continued growth in the future.
2. We regard our customers problems as our own, their needs as our opportunity. Our staff are taught to anticipate the clients' wants, and are trained to come up with solutions to problems that have not even been voiced yet. When serving our clients, we adopt a deliberate, customized and perceptive customer strategy that focuses on providing value, quality and satisfaction.
3. Customer satisfaction is the difference between surviving and thriving. It is the key in creating long-term relationships with our customers. Hence, we have made it the responsibility of every employee to pursue and maintain the goal of “Customer Total Satisfaction” .

Profit Sharing

1. Employees, shareholders and interns are all important assets of the company. They are the key to success in every organization, and a contented and motivated employee/shareholder has a higher probability of making significant contributions to the company. Profits are shared among all, as we believe in the mantra “Take care of your employees, who will in turn take care of your business” .
2. The company's growth is also due to the contributions from both social and industrial environments. We are grateful to be able to give back to society through various channels and programs, and shall continue to expand our corporate philanthropy. Our business also adopts ecologically green practices, reducing harm against the environment We strive to be a socially responsible corporation.
3. The company adheres to its commitment to customers, suppliers, employees, shareholders and the general public. All of these stakeholders are important to the success of the company, and we will continue to look after their welfare in the company.
4. As long as everyone in the company keep in mind the company's business philosophy and work towards its mission & goals, the company will continue to grow and thrive, becoming a world-class corporation that all can be proud of.

Taiwan - Yilan factory

Vision

Through constant change, a humble, enterprising attitude and a crisis-oriented reform attitude, we can stimulate the company and all employees to grow together and achieve staff confidence, customer satisfaction, and fulfill shareholders' business goals.

FineTek is a global technology leader in process automation and control, providing world-class products & services to industrial, transportation, infrastructure and utility sectors. With over 40 years of experience in research and innovation, the company continues to plan for the next decade – with heavy emphasis on industrial digitization, and in advancing control system technologies for food, water and energy.

As the leading company in Asia, we will continue to invest in the development of industrial digital technology for the future. In the spirit of improvement and excellence, the company, since 2003, had begun promoting the "Changda Corporate Culture". It is expected that the Group's employees will follow the following four criteria that serve as the core values of the company:

FineTek Corporate Culture

- Technology:** Pursuing excellence, leader in technology, customer satisfaction, creating the future.
- Humanities:** ethical, upright, integrity, giving back to the community.
- Environmental:** energy saving, green energy products, reducing pollution, environmental protection.
- Action:** commitment, accommodating, continuous learning, proactive.

With consideration and respect to the past, we shall focus on the future and strive to establish a deep relationship of trust and respect with our customers. We hope to become a permanent and important partner for customers to trust and work with, achieving together in becoming a global market leader. "Trusted Process Automation Sensor & Solutions Provider" - FineTek's creed.

Company History

2014~2018 Stable growth stage

- 2018** • Build up Indonesia Manufacturing Factory
- 2017** • Pass OIML International Flow Meter Certificate, only one in Asia
Win - Asia Quality Innovation Award 🏆
- 2016** • M&A Germany Müttec GmbH to expand products line
Set up a service center in Indonesia and Malaysia to expand sales and technical service of customers in Southeast Asia
- 2015** • Pass approval of ASME Manufacturing Process Certificate
Pass TAF Laboratory Certificate for Flow Meter Calibration system
Establish Flow Meter Calibration System
- 2014** • IPO (Stock number: 4549) in December
Win of Taiwan Mittelstand award 🏆

1999~2013 Transformation and growth stage

- 2013** • Yilan new plant start mass production.
won the nineteenth Taiwan Excellence Award 🏆
- 2011** • Established U.S. subsidiary Aplus Finetek Sensor, Inc.
- 2010** • Won the twentieth Executive Yuan National Quality Award for SMEs 🏆
Honored Bronze Medal Award for Human Resource Training Quality System by Council Of Labor Affairs Executive Yuan Taiwan 🏆
- 2008** • Awarded the 17th session of the Ministry of Economic Affairs National Award for SMEs 🏆
- 2007** • Set up German subsidiary FineTek GmbH to service EU customers
- 2005** • Move to Tu-Cheng Industrial Park new factory and office, to expand the scale of operation.
- 2003** • Founded own brand FineTek.
Set up subsidiary in Singapore to service South Asia customers.
- 2001** • Ministry of Economic Affairs awarded Eighth Small and Medium Enterprise Innovation Research Award 🏆

1979~1999 Entrepreneurial development stage

- 1998** • Shanghai Office established to service customers in Greater China.
- 1979** • Early beginnings of manufacturing industrial control systems.

Sensing Physical Principles

FMCW Radar Level Transmitter

FMCW radar adopts a high frequency signal, which is emitted via an antenna and swiye frequency. During the measurement, the level is calculated from the transmitting frequency and the received frequency difference, which is directly proportional to the measured distance (or material surface).

FEATURES

Non-contact measuring. No maintenance needed. Not affected by specific gravity, temperature, conductivity, humidity. High accuracy and wide measurement range.

- Operating temperature : -40~200°C
- Operating pressure : 40bar

RF Admittance Level Transmitter

RF Admittance Level Transmitter utilizes the capacitance formed between the sensing probe and the reference probe or the metal vessel wall to calculate the level of the medium inside the vessel according to the capacitance theory that the capacitance and vessel are proportional increased.

FEATURES

Low consumption of power, easy wiring. High accuracy of linearity. Temperature compensation. Easy calibration (Any 2 points for calibration), on-sight display

- Operating temperature : -40~200°C
- Operating pressure : 40bar max.

By-Pass Level Transmitter

The By-Pass Level Indicator is installed outside of a vessel or tank. The liquid level in the tank can easily be observed from the change of the flag color.

FEATURES

Applicable in environment with high temp., high pressure, strong acid, strong alkaline and hazardous locations; no power supply is needed.

The structure is simple but durable and reliable. It is also available with various options for upgrade, such as switch, transmitter, 4~20mA, RS485 output.

- Operating temperature : -20~200°C
- Operating pressure : 100bar max.

Contactless level monitoring

The sensor sends out a microwave field, and it received by opposite receiver to detect and analyze. If solids move through this field, the microwaves are reflected and received by the sensor again, and it converts into a switching process.

FEATURES

Contactless microwave measurement for all bulk materials. Adjustable sensitivity, damping, hysteresis and filter time. Easy installation by compact form

- Operating temperature : -20~85°C
- Operating pressure : 25bar max.

Pressure Level Transmitter

The sensor detects the liquid level through the diaphragm, and at the end of the sensor, the atmosphere is needed as a reference.

Per 1m water hight produce 0.1kgf/cm pressure, and with this principle, actual liquid level can be calculated. °

FEATURES

Various liquid level measurement. Pipe pressure detection. Various applications, simple operation. Analog output, fast responding

- Operating temperature : Max.150°C
- Operating pressure : 4~20mA

Electromechanical-Tuning Fork/ Rotary Paddle Level Switch

When the sensor is stopped by the measuring liquid or solid, it alarms the measuring level.

FEATURES

Suitable for all kinds of solid (powder) control. Easy installation by compact form. Simple wiring, no complex setting is needed.

- Operating temperature : -20~200°C
- Measuring Density : 0.5g/cm (Rotary Level Switch)
0.01g/cm (Tuning Fork Level Switch)

Sensing Physical Principles

Optical Level Switch
SDX series is an optical level switch line that emit a beam of infrared light into the tip (prism) of the sensor.

FEATURES
Simple, compact, and robust
No moving parts
Built-in, solid-state electronics
Easily removed, cleaned, and reinstalled
LED switch indication

- Operating temperature : -10~80°C (Plastic tip)
-20~120°C (Glass tip)
- Operating pressure : 60bar max.

Magnetostrictive Level Transmitter
Using buoyancy, magnetostriction and state-of-the-art electronic technologies to accurately measure the level. When the float site changes along with the liquid level, it continuously output and converted into current or digital RS485, comparing to the level, the signal is the absolute site, even when the power is off, no adjustment is needed.

FEATURES
High accuracy. Repeatability of 0.004% F.S.. Fast response time
Durable structure, dust-proof, withstands high pressure. Oil/water dual level indication. Support HART / RS485 and 4~20mA / voltage output.

- Operating temperature : -40~200°C
- Operating pressure : 30bar max.

Pressure Switch
Using an internal diaphragm that is exposed to process pressure via the pressure switch threaded process connection. When the process pressure is greater than the force of the compression spring the switch contact will open or close depending on the choice of the contact form.

FEATURES
Robust pressure switch even in severe duty applications
Adjustable or fixed pressure
High quality and cost effective
Suitable for various industrial equipment

- Operating temperature : -30~100°C
- Operating pressure : 300bar max.

Lubrication Equipment

Sanitary Intelligent Level Switch
The sensor tip will send out electric field signal, and different resonance frequency is created according to different medium. Thus a switching signal will be triggered if the sensor is covered with material.

FEATURES
Easy installation by standard connection with IP67/IP68/IP695 as protection grade.
Unaffected by foam and viscous medium.
Applicable to measure the single-point level of liquid, viscous medium and powder medium in the container and pipe; also providing pump dry run protection.

- Operating temperature : -40~100°C (Continuously)
-40~150°C (Less than 1HR)
- Operating pressure : 30bar max.

Magnetic Float Level Transmitter
When float is raised or lowered by the liquid level, the magnet inside the float and the sensing rod will induce a resistance output, which is directly proportional to the liquid level.

FEATURES
Sensing elements are protected with a plastic package for safety in use and transport.
High performance and reliable electric circuit modular design
Operation is not affected by temperature and pressure changes.
ATEX Explosion Certification/ DNV-GL/ ABS/ BV/ LR Marine Certification

- Operating temperature : -20~120°C
- Operating pressure : 30bar max.

Temperature & Level Monitoring Transmitter
The tank uses One wire multi-point temperature module and placed inside the armored steel cable, to sense the temperature signal at each position of the material. At the same time, cover the material by a steel cable for the sensor to detect the change of capacitance and convert it into the material height measurement, through RS485 interface to transfer the data to the central control room or human-machine interface, the double data of temperature and level of the materials in the storage tank can be easily monitored, for the most convenient and efficient grain storage management.

- Measuring Range : -10~85°C
- Measuring Length: Maximum 30m

▪ Current Input	±0.01mA F.S	-
▪ Power Output	10~30Vdc	10~30Vdc
▪ Current Output	-	Open Collector to 30 Vdc 30mA max. load
▪ Electrostatic protection	IEC61000-4-2 ESD 8kV Air,4kV contact Under wireless state ESD 4kV Air,2kV contact	IEC61000-4-2 ESD 8kV Air,4kV contact Under wireless state ESD 4kV Air,2kV contact
Application	<ul style="list-style-type: none"> Use with continuous analog output type sensor 	<ul style="list-style-type: none"> Use with any switch contact output sensor

Pneumatic Products

Pneumatic vibrator

Reciprocating vibrator

Air hammer

Diaphragm valve

	BVK/ BVR/ BVT	BVP	BAH
Advantage	<ul style="list-style-type: none"> Vibration frequency and amplitude can be adjusted according to usage requirements Capable of start, stop instantly Good airtightness, used in explosion-proof, powder dust and wet places 	<ul style="list-style-type: none"> Low frequency vibration, the best effect in material flow Amplitude and frequency can be adjusted according to requirements during vibration Capable of start and stop work instantly 	<ul style="list-style-type: none"> Single impact, one impact wave is generated for every action Impact force and impact interval can be adjusted according to requirements to improve the impact force of air hammer
Technical Data	<ul style="list-style-type: none"> Body materials Air inlet size Use air pressure Air consumption 3 Frequency (V.P.M) Vibration force Impact force 	<ul style="list-style-type: none"> Body materials Air inlet size Use air pressure Air consumption 3 Frequency (V.P.M) Vibration force Impact force 	<ul style="list-style-type: none"> Body materials Air inlet size Use air pressure Air consumption 3 Frequency (V.P.M) Vibration force Impact force
Application	<ul style="list-style-type: none"> Applicable acid and alkali liquid, pharmaceutical tank, high temp. / explosion dangerous places Diesel generator oil level detection Hydraulic equipment level detection environment 	<ul style="list-style-type: none"> All types of liquid detection in the can Oil liquid level detection of boiler equipment 	<ul style="list-style-type: none"> low-specific gravity sewage control Suitable for the places of clear water with smaller installation holes Control applications in PLC or DCS, recommend to use magnetic reed switch type

	BRD&BHV
Advantage	<ul style="list-style-type: none"> Fast response, high flow rate and good cleaning effect Low gas consumption Capable of working with sequence control circuit board to control the spray time and interval for easy adjustment
Technical Data	<ul style="list-style-type: none"> General characteristics Working fluid Diaphragm materia Operating tempe Electrical characteristics Temp. resistance rating Connection method Protection rating Standard voltage Operating temp.
Application	<ul style="list-style-type: none"> Dust collector pulse cleaning filter system All types of filter bags, filter tanks, flat bags, ceramic pipes and metal fiber filter bags

Pneumatic Products

Sequence Controller

Sequence Controller

	AE7X	AE1X
Advantage	<ul style="list-style-type: none"> Instinct adjustment mode, fast and convenient Remote control contact to facilitate remote control Capable of working with sequence control circuit board to control the spray time and interval for easy adjustment 	<ul style="list-style-type: none"> Digital display, easy operation Microcomputer control, more precise action Remote control contact to facilitate remote control Capable of working with sequence control circuit board to control the spray time and interval for easy adjustment
Technical Data	<ul style="list-style-type: none"> Working power: 100~ 240 Vac, 50/ 60Hz; 24 Vac, ±10% Spray interval: 2~60 Sec Spray time: 20~200 million seconds Sequential stepping number: 1~10 points Ambient temp.: -25~75°C Panel Display: - Machine stopping cycles: - Contact output: Thyristor 	<ul style="list-style-type: none"> 110/220V , ±20% 50Hz/60Hz 1~999 Sec 10 million second~9.99 seconds 1~10/ 1~20 points 0~70°C Two sets digital display 0~99 times Thyristor
Application	<ul style="list-style-type: none"> Used with the dust collector pulse valve 	<ul style="list-style-type: none"> Used with the dust collector pulse valve

Safety Products

Misalignment switch

Cable pull switch

Speed monitor

Microcomputer speed monitor

	SRT	SRS
Advantage	<ul style="list-style-type: none"> Easy to install, sensitive action Pull rod arm can operate in both directions with a maximum range of 75° each direction Internal torque spring can return automatically Prevent the conveyor system down time, product loss, loss caused by cost of replacing conveyor belt ent. 	<ul style="list-style-type: none"> Stop switch can be at any position of the cable pull, sensitive action When cable pull rod rotates 30°, capable of outputting the shutdown and alarm signal Cast aluminum casing with good airtight, IP-67 weather resistant protection rating
Technical Data	<ul style="list-style-type: none"> Contact capacity 15A, 125/250 Vac 5A, 30 Vdc SPDTx2 Action pull force 3.4~5.4N.m (0.35~0.55kgf.m) Reset Mode Automatic return Ambient temp. -20~60°C Explosion proof environment (-20~50°C) Protection Rating IP67 Casing materials Aluminum alloy baking varnish Explosion proof rating Ex tD A21 IP67 T85°C 	<ul style="list-style-type: none"> Contact capacity 15A, 125/250 Vac 5A, 30 Vdc SPDTx2 Action pull force 49±9.8n (5±1kgf.m) Reset Mode Manual return Ambient temp. -20~60°C Explosion proof environment (-20~50°C) Protection Rating IP67 Casing materials Aluminum alloy baking varnish Explosion proof rating Ex tD A21 IP67 T85°C
Application	<ul style="list-style-type: none"> Traditional belt conveyor Underground, cable supported belt conveyors Stacker/reclaimer conveyors Tripper and shuttle conveyors Ring skirt plate conveyors and coal feeder conveyor belt 	<ul style="list-style-type: none"> Traditional belt conveyor Double conveyor Ship loading and unloading system Horizontal feed system Plate feed conveyor

	EDX1	EDX4
Advantage	<ul style="list-style-type: none"> Alarm point setting adopts knob operation, super fast speed Status indicator light, clearly and correctly determine whether or not the current speed is abnormal Universal relay output type eliminates complex wiring processes Equipped with contact and non-contact structural design 	<ul style="list-style-type: none"> Seven segment LED display 0~999rpm Machine starting delay monitoring function Photoelectric switch for speed monitoring, not affected by the field environment Alarm monitoring function: low speed, stop, power failure, overload
Technical Data	<ul style="list-style-type: none"> Working power 110Vac or 220Vac±10% 50/60Hz Rotation speed range 0~150 rpm Contact capacity 5A / 250Vac · 5A / 30Vdc Output type Relay output 1SPDT Protection Rating IP65 Casing material Aluminum alloy baking varnish Ambient temp. -40~ 80°C Explosion proof rating Ex tD A21 IP65 T85°C Induction method Contact type/Non-contact type 	<ul style="list-style-type: none"> Working power 85~265Vac (Explosion proof type: 100~240Vac) Rotation speed range 0~999 rpm Contact capacity 5A / 250Vac · 5A / 30Vdc Output type Relay output 1SPDT / 4~20mA Protection Rating IP65 Casing material Aluminum alloy baking varnish Ambient temp. -20~ 70°C Explosion proof rating Ex tD A21 IP65 T85°C Induction method Contact type
Application	<ul style="list-style-type: none"> Traditional belt conveyor Double conveyor Ship loading and unloading system Horizontal feed system Plate feed conveyor 	<ul style="list-style-type: none"> Traditional belt conveyor Double conveyor Ship loading and unloading system Horizontal feed system Plate feed conveyor

Installation and Applications

Applications of FMCW Radar Level Transmitter in Tank Installation

Applications of Guided Wave Radar in Tank Installation

Model	JFR-202	JFR-212	JFR-222	JFR-232	JFR-242
	JFR-204	JFR-214	JFR-224	JFR-234	JFR-244
Beam Angle	$\pm 9^\circ$	$\pm 9^\circ$	$\pm 5^\circ$	$\pm 3^\circ$	$\pm 10^\circ$
Extension pipe min. length	160mm	200mm	150mm	270mm	100mm

Installation and Applications

Applications of Ultrasonic in Tank Installation

Applications of Magnetostrictive Level Gauge in Tank Installation

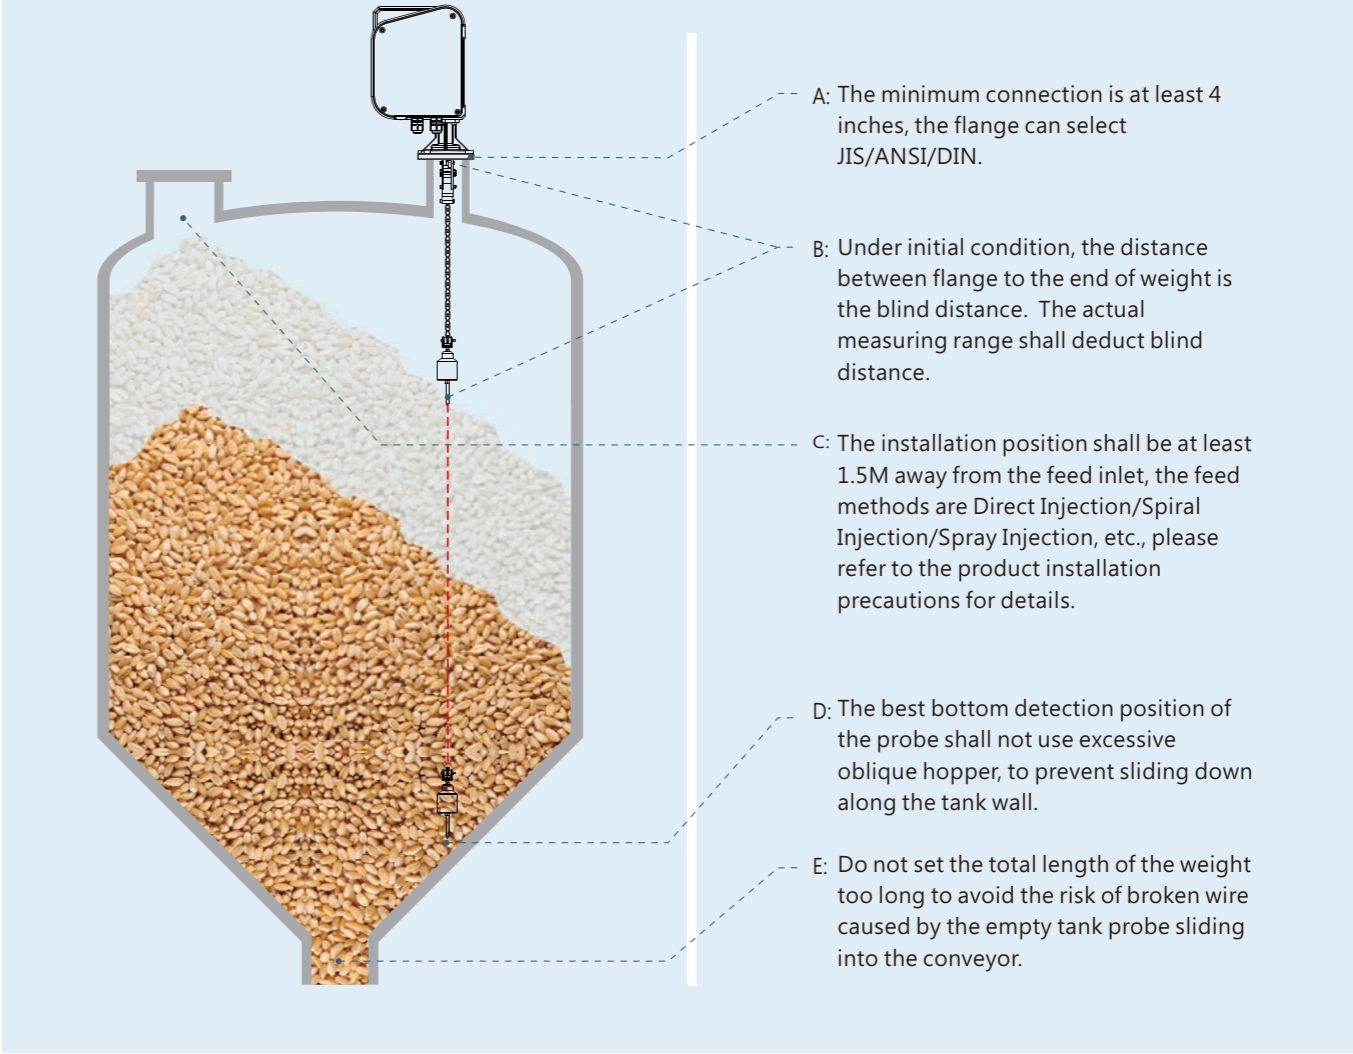

Installation and Applications

Applications of By-Pass Level Transmitter in Tank Installation

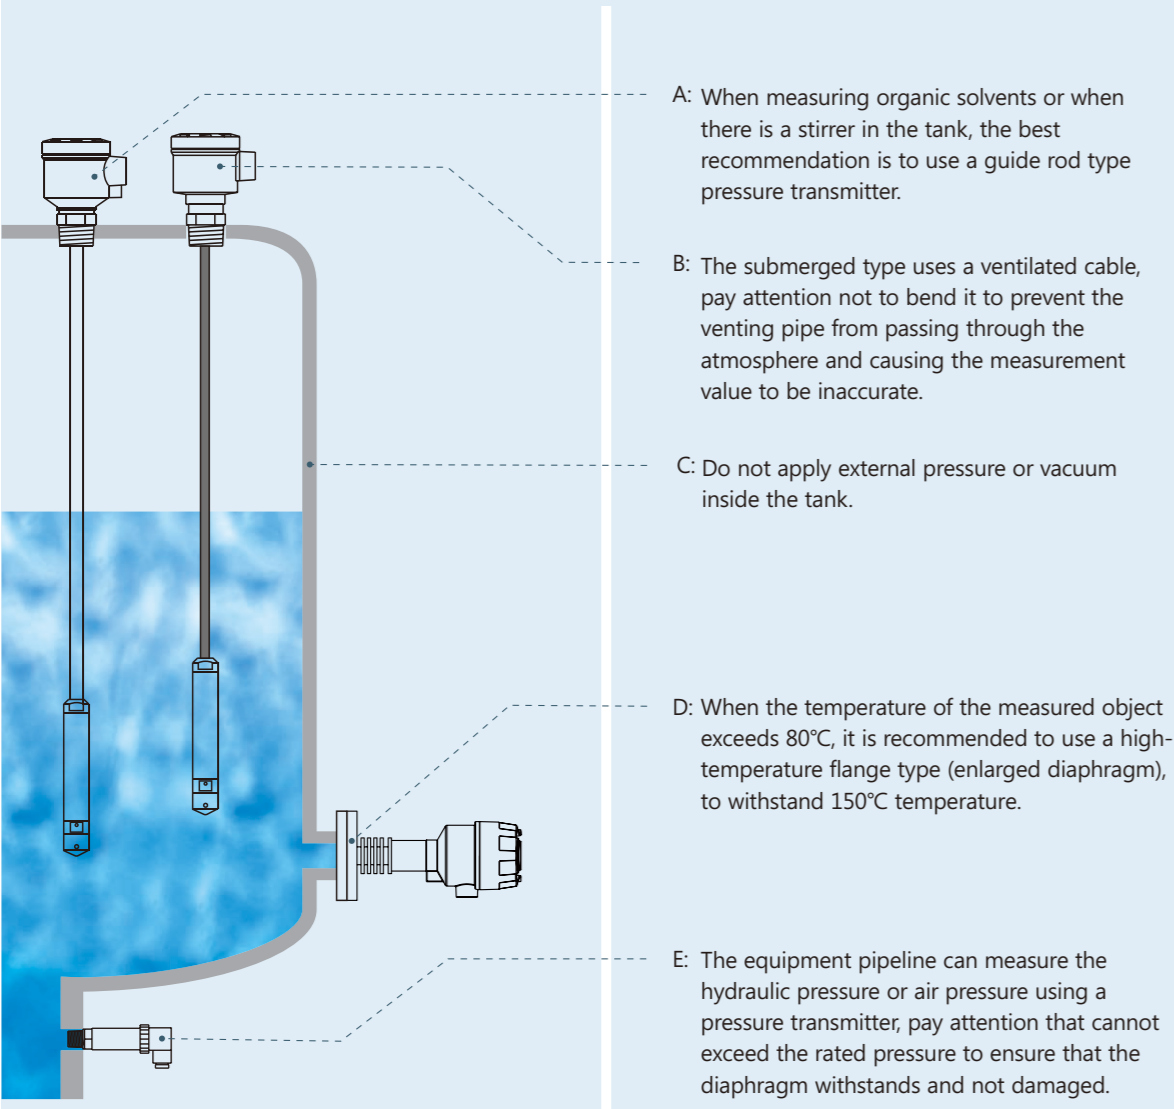

Applications of Electromechanical Level Transmitter in Tank Installation

Type				
Places for Use	Generally used for acidulous and alkaline materials	Suitable for liquid level or solid level granular are irregular	Suitable for the specific gravity of material is lower than (SG≤0.5)	Suitable for plastic materials

Installation and Applications

Applications of Pressure Transmitter in Tank Installation

Applications of Flowmeter in Tank Installation

***To detect the flow of the catch basin pipeline, select FineTek separate type flowmeter, with sensor protection rating of IP68 (underwater 6M/48 hours).

Installation and Applications

Applications of Webbed Wheel Flowmeter Installation

Installed in the case of a control valve

Installed in the case of Double bend pipe

Installed in the case of pipe with two 90° joints and less than three times the distance of the T-pipe

Installed in the case of one 90° joints

Installed in the case of enlarged pipe diameter

Installed in the case of reduced pipe diameter

Applications of Optical Level Switch Installation

The front end of Optical Switch cone sensor shall be at least a distance of 30mm from the tank wall.

When mounting Optical Switch on the threaded casing pipe, the sensor head must be exposed outside the casing pipe.

Applications of Thermal Dispersion Flow Switch

When the liquid pipe line is not full, SP must be installed below the pipeline, and the liquid level must be higher than the flow sensing rod.

Applications of Paddle Type Level Switch

Must make sure the flow arrow "FLOW" mark on the product is parallel to the conduit when the assembly is complete.

During installing, it is necessary to pay attention to the center of the pivot of the mechanism drive ring cannot be extended in the threaded tube, to avoid insufficient paddle deflection angle, and causes erroneous action.

Installation and Applications

Application of Liquid Level Switch Installation Application

- A: Please keep the Magnetic Float Switch away from the water inlet or use anti-wave pipe, to avoid wave motion from causing the switch to start and stop repeatedly, increase the service life, and pay attention to the venting hole is required on the upper end of the anti-wave pipe.
- B: Cable float ball complete set enclosure outlet, install the connection at least 4 inches specifications; heavy hammer and float need to have a 100mm spacing in order to have flexible length floating, the installation position and the tank wall shall be maintained with a distance of more than 250mm.

C: Please install the connection pipe length and pipe diameter of Side Mounting Float Switch according to the size of following table

Pipe inner diameter (a) (Max.)	45~50mm	50~55mm	55~60mm	60~65mm	65~70mm
Length(b) (Max.)	130mm	140mm	150mm	160mm	170mm

Solid Level Switch Installation Application

- A: Avoid installing near the feed inlet, to reduce damage to the sensing rod during impact from the feed material. If the switch must be installed near to the feed inlet, please add a protection baffle 200mm above the switch.
- B: The sensor rod shall be tilted downward and maintained an angle of 20° to the horizontal line as optimum, which reduces sensitivity, and reduce damage to the switch caused by the impact of feed material.

Pay attention to the installation position during side mounting, if the feed inlet is not fed from the center, the angle of repose α and the feed inlet corresponding point must be considered for installation, otherwise, it is easy for the level switch not operating.

- A: When install the Rotary Paddle Switch with adjustable shaft length, use the shaft length to adjust appropriate length, to avoid the material angle of repose from causing the switch malfunction
- B: The Rotary Paddle Switch utilizes the sickle paddle, the connection does not need to be opened too wide, and install the product on the side of the tank directly.

When the tank or the conveying pipeline is equipped with vibrator equipment, it is necessary to consider whether it will damage the internal parts of the switch.
 ※ Recommend to use the Company's SA140 Separate Type.
